

AURALIS

THE ART OF SILENCE

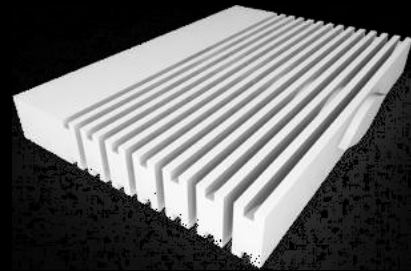

4/4mm, 3-layer spruce

Incision type **JANUS**

The plates cut on both sides are suitable for free-standing use, as they have the same cutting pattern on both sides.

Thick panels can also be cut around a surprisingly tight radius. They are mainly used as room dividers and privacy screens.

The incisions of **AURALIS JANUS** are made on both sides of the board. Thereby even thick boards can bend around small radius. The board looks the same on both sides and is therefore suitable to be used free-standing as partitions.

Technical Data

Front & back side: 4/4 mm
3 layer spruce

Material:	MDF, Plywood, 3-Layer Board
Standard incision:	4 mm Nut / 4 mm Steg Cut / Bar
Min. bendign radius:	Ca. 100 mm
Open area:	20% - 40%
Standard dimensions:	2400 mm x 1200 mm x 12- 42mm
Surface:	Verneer, spray paint, coat, oil
