

AURALIS

THE ART OF SILENCE

Incision type: **JANUS-TEX**

The three-layer panels are provided with a textile middle layer. This can be made of colored fabric or an acoustically effective felt. This gives the product visual and acoustic added value. The panels are suitable as privacy screens and for improving room acoustics.

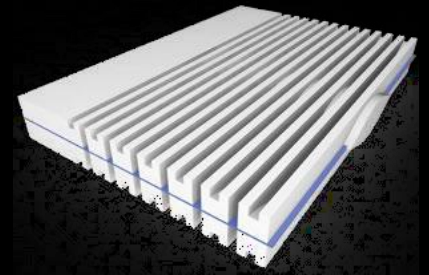

These boards contain an intermediate layer of fabric. This layer can either be of colored fabric or of a acoustic active felt. Therefore, the visual effect is different from other boards and it offers additional acoustic absorption. It can be used as partition as well as to improve the room acoustics.

4/4mm, 3-layer spruce, blue fabric

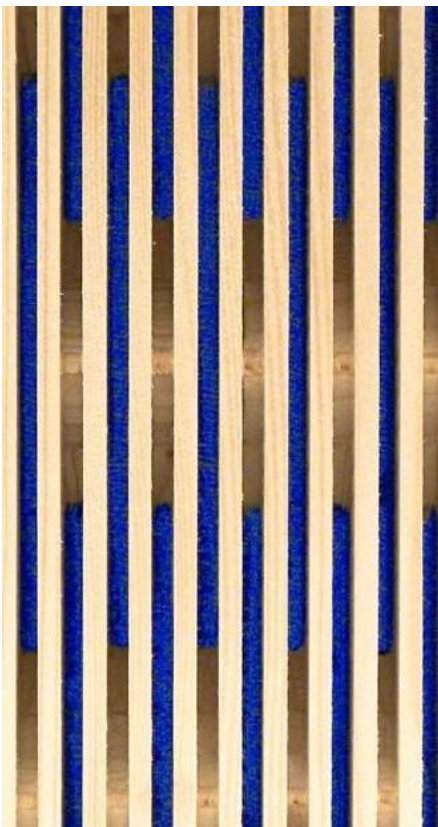

4/4mm, plywood birch, grey felt

Technical Data

Material:	MDF, Plywood, 3-Layer Board
Standard incision	Cut / Bar
Min. bendign radius	Ca. 150 mm
Textile layer	Fabric / Felt
Standard dimensions	2400 mm x 1200 mm x 12- 42mm
Surface	Verneer, spray paint, coat, oil

front & back side: 4/4mm,
blue fabric, 3-layer spruce
