

AURALIS  
THE ART OF SILENCE

## Pyramid Sound Absorption Foam

- **【Special Material】** Size for each one is 2\*12\*12 inch. The acoustic panels use special and high quality material, which is fire resistant and have better noise canceling.
- **【Noise Reduction】** Installed to reduce noise pollution as they remove echoes and background sounds not by blocking the sound but by absorbing it. Acoustic foams are used to control the reverberation sounds made and this is quite different from soundproofing, it effectively deletes standing waves and flutter.
- **【Widely uses】** These sound cancelling foams can improve the acoustics in a room and make it a more valuable and useful space, whether for your studio or home theatre, entertainment room, church, office, Gymnasiums, or any space you needed.
- **【Unique Decoration】** This soundproofing absorption panel can be also used as an art decoration on the wall, which adds a great deal of romance and builds a mass of good memories in a warm, comfortable and safe surroundings.
- **【Easy to install】** Our Acoustic Panels come with double tape sticker and simple installation. Notes: 5 pcs sticker for each foam. No special tools are needed for installation. When using stickers, please make sure the wall is flat and free of foreign matter such as powder, which will affect the effect of the paste.

Made of environmentally friendly polyurethane foam.

Has effective sound absorption characteristics, but also does not cause any harm to the human body.

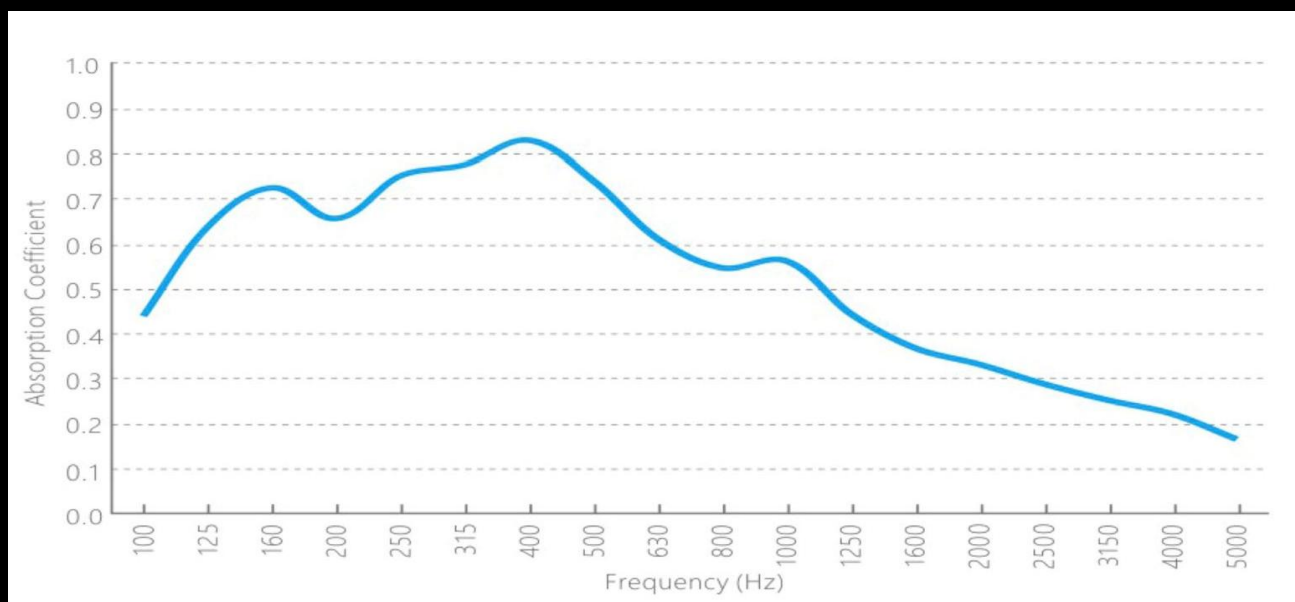

Absorb mid to high range frequencies and diminish echoes.
